Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4,5,7,8,9,11 are rejected under 35 U.S.C. 102(b) as being anticipated by Naestoft, et al (5071433).

Naestoft, et al discloses a breast prosthesis comprising a back section adapted for facing a user 18 and an adhesive element 30 forming a continuous surface substantially conforming to said back section said breast prosthesis said adhesive element comprising an inner body lined with a material (see column 8, lines 60+), wherein a side of said adhesive element facing said breast prosthesis detachably secured to said back section adhesive of said breast prosthesis and a side said is detachably element adapted for facing a user adherable to the user.

Claims 2 and 4, see column 8, lines 60+.

Claim 5, see hook/loop fastener 20.

Claim 7, the profile of the breast form of Naestoft et al is shell-shaped as broadly claimed.

Claim 8, see annular region 18.

Claim 9, see elevated edge 16 adjacent the annular region 18.

Art Unit: 3738

Claim 11, in so far as limiting the scope of the claim, "light weight" is fully met by the breast form of Naestoft, et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Naestoft, et al (5071433) as applied to claim 1 above, and further in view of Plass (GB 2202745).

Plass teaches the use of silicone as the adhesive material. Naestoft et al does not disclose any specific material suitable for use as the adhesive. In view of the teachings of Plass, to use silicone as the adhesive for providing detachability to the breast form of Naestoft, et al would have been obvious to one with ordinary skill in the art.

Allowable Subject Matter

Claim 12 is allowed.

Art Unit: 3738

Claims 6 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
